

Is Your Agency Prepared For Novel H1N1 Vaccination Forms Processing?

Millions of Americans will receive the novel H1N1 vaccination during this year's flu season.

Each health agency administering the vaccine must report data on **all** H1N1 vaccination recipients.

This means that each agency must find a way to quickly and accurately report important data from **thousands** of patient vaccination forms each week.

Is your agency prepared?

Syscom Services is here to help!

Syscom Services specializes in the intelligent automated forms processing solution, Cardiff TeleForm. TeleForm **automatically** captures information

Sample H1N1 Vaccination Intake Form

The form includes sections for: Personal Information (Name, Address, Phone), Medical Conditions (Heart, Lung, Asthma, etc.), Pregnancy Status, and Vaccination Status (MM, M, M+V, etc.). It also features a 'STOP - DO NOT WRITE BELOW THIS LINE' section for clinical information and a 'Please use reverse side for notes' instruction.

from paper and electronic sources via fax, e-mail, internet, scanners and more.

TeleForm **quickly and accurately** reads and extracts handwriting, machine print, and optical marks **with little-to-no human intervention**.

Syscom has worked with many health agencies to develop and implement powerful TeleForm solutions that have proven to:

- ❖ **dramatically accelerate completion times,**
- ❖ **significantly increase accuracy of data,**
- ❖ **and drastically reduce costs associated with manual data entry.**

Call our H1N1 project expert today to find out how Syscom Services can help you

with a quick and easy TeleForm implementation!
